## Professional Experience

### Senior Software Engineer | Tech Mahindra | Jul 2022 – Mar 2025

- Led Drupal front-end development for a major WHO health initiative, improving UI consistency and portal engagement.
- Designed scalable Figma interfaces reducing design iteration cycles.
- Optimized CMS front-end using SCSS, resulting in improved page load times.
- Launched new projects immediately post-contract completion, minimizing downtime.

### Drupal Consultant | Srijan Technologies | Dec 2021 – May 2022

- Delivered a 6-month Drupal project, managing front-end development and client communication.
- Led a team of front-end developers, enhancing project efficiency and timely delivery.
- Created responsive web solutions for the United Nations' digital platforms.

### **Drupal Themer / Front-End Developer | Gokhale Method | Nov 2020 – Nov 2021**

- Developed and maintained Drupal themes and sub-themes for high-traffic websites.
- Implemented responsive layouts and optimized CSS/SCSS for better UX and faster load times.
- Increased user engagement by refining UI components and site performance.

### **Front-End Developer | Srijan Technologies | Jul 2012 – Nov 2020**

- Designed and implemented responsive Drupal themes and sub-themes.
- Reduced styling errors through optimized CSS/SCSS and improved code review processes.
- Created scalable Drupal modules improving site load times and engagement rates.

### **Front-End Developer | Liquid Designs | Apr 2010 – Jun 2012**

- Delivered high-quality Drupal 7 projects within tight timelines.
- Enhanced site performance by 10% through CSS optimization and minification.
- Implemented jQuery-based UI features to boost user interaction.
